Dear Hiring Manager,

I am writing to express my strong interest in the Web Developer role at Amazon. With a passion for building modern, scalable applications and a background in full-stack development, I am enthusiastic about the opportunity to contribute to your team's innovative projects.

I am currently pursuing a B.E. in Information Technology at M.H. Saboo Siddik College of Engineering, where I have consistently maintained strong academic performance (CGPI: 8.98). Alongside my studies, I have designed and developed impactful projects including Printhub, a smart print job management platform; File Crew, a collaborative document-sharing app; and SnX, an immersive 3D outfit exploration platform. These experiences strengthened my expertise in React, Next.js, Node.js, and Tailwind, while also refining my problem-solving and design thinking skills.

Beyond academics, I have been recognized for my technical contributions, Winner of TECHFUSION 2024 Project Competition and second place in Frontend Designing using HTML and CSS. These achievements reflect not only my technical capabilities but also my ability to deliver results under competitive conditions.

What excites me about Amazon is your commitment to building impactful digital solutions at scale. I am eager to bring my skills in modern web technologies, database management, and cloud platforms such as AWS and Azure to contribute to meaningful projects, while continuing to grow as a developer in your dynamic environment.

I have attached my resume for your review and would welcome the opportunity to discuss how my skills align with Amazon's goals. Thank you for your time and consideration.

Sincerely,

Abdurrahman Qureshi
